

Fantasy Football Cheat Sheet PDF 2026

Approval draft. Built Aug 26, 2026 from NovaPredict directional 2026 rankings generated Aug 26, 2026. Use this fantasy football cheat sheet PDF as a printable draft-room snapshot, then use the live rankings board for the freshest values before you pick. Website: <https://novapredict.com>.

How to use this sheet

Start with tiers, not raw rank. A tier break is the signal that a position is about to get expensive. Use ADP as the room price, VORP as the value signal, bye weeks as the roster-risk check, and PPG as context only. The best pick is the player who adds the most value over what you could still get later.

Draft-day rules

1. Print as close to your draft as possible.
2. Circle the last two players in each tier.
3. Do not chase a run unless the next tier is about to disappear.
4. In early rounds, prefer safer outcome shapes.
5. In late rounds, chase players who can actually change your lineup.
6. Recheck live rankings before the draft starts.

Data note: these rankings are directional draft-prep outputs, not a public live accuracy record. NovaPredict's in-season accuracy record starts Week 1 of the 2026 NFL season and is graded publicly after locked projections are scored.
